

Plate Buffer

SWERUB PB is used for mobile or stationary applications in order to absorb high dynamic and shock forces.

APPLICATIONS

Agricultural Vehicles, Construction Equipment and Vehicles, Heavy Industrial Machinery with high impact forces.

CHARACTERISTICS

SWERUB PB is used for absorbing high levels of shock and impact forces. A large rubber buffer allowing a high level of deformation gives an effective impact damping. Maximum load ranging from 750 to 2400 kg per Plate Buffer.

TYPE	d1 [mm]	B [mm]	C [mm]	d2 [mm]	E [mm]	F [mm]	G [mm]	M-max (Kg)
PB84	84.0	32.0	19	46	6.9	68.6	3.2	750.0
