

Plate Buffer Rounded

SWERUB PBR is used for mobile or stationary applications in order to absorb dynamic and shock forces.

STANDARDIZED DESIGN

Nitrile Rubber NBR70, Oil resistant
Steel Plate Corrosion protected Fe/Zn 8/P5

OPTIONAL DESIGN

The SWERUB PBR Buffer is available in desired shore and rubber qualities.

APPLICATIONS

Agricultural and Forestry Vehicles, Trucks, Overhead Cranes, Industrial Machinery with impact forces.

CHARACTERISTICS

SWERUB PBR is used for absorbing shock and impact forces. A rubber buffer available in different Rubber Hardness and Qualities allowing deformation gives an effective impact damping for desired purposes.
