

Rubber Block

SWERUB RB Rubber Block is used for isolating Heavy Machinery from a building Structure in order to remove Vibrations, especially low Frequency Vibrations. Block material is flexible in both horizontal and vertical directions.

STANDARDIZED DESIGN

Natural Rubber (NR)

Hardness:
40 Shore A
60 Shore A

APPLICATIONS

Vibration Isolation from Heavy Machines in Buildings
Suitable as a base for Heavy Industrial Machinery

CHARACTERISTICS

Isolating Low Frequency Machines.
Especially good for Vibration Isolation in Building Structures.
Wide and Heavy Load Range; maximum load from 1800 up to 8000 kilogram per Block.

Article number	L [mm]	B [mm]	H [mm]	Weight (Kg)	M-MAX (Kg)
RB0-40	195	175	150	5.2	1800
RB0-60	195	175	150	5.7	3800
RB1-40	400	175	150	10.7	4000
RB1-60	400	175	150	11.8	8000
