

SWERUB SW is a heavy duty mounting for static and shock loads in compression. Provides high isolation in the horizontal shear direction.

### STANDARDIZED DESIGN

Natural Rubber (NR)

Four different sizes and two different Hardnesses (shore 40° and 60°) with a maximum load from 2 250 to 30 000 kg.

### APPLICATIONS

Grinding and Hopper machinery, Crushing Machines, Mills, Soil Compactors

### CHARACTERISTICS

SWERUB SW mounting has a cylindrical rubber section, with interleaf metal plates, bonded between two square outer metal fixing plates. Suitable for large compressive forces with min. deformation and low shear stiffness rate.

SWERUB SW can also be connected in series, e.g. two mountings connected on top of each other in order to achieve an even higher isolation.
