

Two-Piece T-Shaped Damper

SWERUB TP is used primarily for mobile applications where high dynamic and shock forces are present. The SWERUB TP-mounting is available in desired shore and rubber quality.

APPLICATIONS

SWERUB TP mountings are used for vibration isolation on engines, machinery and in vehicles for noise and vibration reduction such as in cabins and other connected units. Used in Construction equipment, Military vehicles, Material handling vehicles, Agriculture vehicles.

CHARACTERISTICS

Enables Horizontal stability. Vertical movements in both directions are limited. Damping in all directions as well as Damping of structure-borne noise. Load range 40 to 1200kg.

SWERUB TP mountings are suitable for both Static and Mobile applications, and should be installed with top and bottom washers to provide a failsafe installation.
